Emergency On-Call Retainer	\$800	\$720	\$614	-23%	\$/property/month

COMMERCIAL TERMS

Blended effective rate

~\$103 / hr across all trades at Structure's expected mix.
~22% below Backnine's published blended rate of \$131/hr.

Materials markup

10% on materials & parts (vs. 15% standard). Pass-through at cost on any single line item over **\$500**.

Rebate structure

Volume discount is baked into the headline rates above. **A back-end rebate structure is available upon request** if Structure prefers that commercial model — we'll restate rates accordingly.

Annual rate review

Rates locked Years 1–2. Year 3 indexed to lesser of (a) CPI-U San Francisco MSA or (b) 4% cap.

Payment terms

Net-30 from invoice. 1% discount for Net-10. Late-payment 1.5%/mo after 45 days.

Term & termination

3-year initial term. Either party may terminate with 90-day written notice for any reason after Month 12. For-cause termination at any time.

CONDITIONS TO HONOR THESE RATES

Minimum units under service	350+ units under active service by Month 6, sustained thereafter. Expected WO volume at industry benchmark: ~140–190 WO/month. Unit count is the durable metric and the sole condition on the partner rate tier.
Quarterly business reviews	Joint performance & spend review, both teams present
Data transparency	Live WO feed, monthly reporting, full audit trail

If unit count runs below 350 for two consecutive quarters, rates revert to **Owner Rate** tier (10% discount off standard) on 30-day notice. WO volume itself is not a condition — we don't want to incentivize either side to manufacture work orders.
